Subject: Rear Door Lock Rods

Stoughton Trailers is simplifying the door lock rods across our dry van product line. Currently, we have a combination of lock rods styles on our swing door dry vans, using both styles NS-SH and DL-NH. We are implementing a running change to use exclusively DL-NH in the future. By January of 2024 we expect to be fully converted to DL-NH at all of our dry van manufacturing plants. Many customers prefer to the DL-NH style as the design allows for the toe to get a better fit within the keeper, which makes it easier to secure the door in the closed position.

Contact Stoughton Parts Sales, LLC for replacement aftermarket parts identified by VIN at www.stoughtonparts.com, parts@stoughtontrailers.com or 800-227-5391

Please contact your sales representative if you have any questions.
