Stoughton Trailers Announces New National Corporate Headquarters Location in Stoughton Work to Begin in 2023 for Nation's 4th Largest Trailer Maker

STOUGHTON, WI (January 9, 2023) – Stoughton Trailers, LLC, a global leader in transportation equipment, announced plans today to build their national headquarters in Stoughton. Stoughton Trailers is the nation's 4th largest manufacturer of semitrailers and ninth largest manufacturer in the world.

"Our family made Stoughton our home over 60 years ago. Today's announcement of Stoughton Trailers' new state-of-the-art office building underscores our history and commitment to this great community," said Stoughton Trailers President & CEO Bob Wahlin.

Stoughton Trailers is a family-owned, Wisconsin-based company which began operations in Stoughton in 1961. The company will retain its existing manufacturing facilities in Stoughton, Brodhead, Evansville, and Waco, Texas.

The new headquarters will be home to approximately 125 employees and will provide a state-of-the-art, high efficiency, collaborative, innovative, high-quality atmosphere. Though not all of the Stoughton Trailers' employees will work at the new site, employees will have access to its amenities, including exercise facilities, conference rooms and other workspaces. The new corporate headquarters will be located on the corner of Highway 51 and County Road B, in the far northwest corner of the City of Stoughton. The company's plans for the site will provide for future expansion opportunities and may possibly include an additional public and/or private development.

"Stoughton Trailers, and our 1,600 employees, are proud to be the city's largest employer. There has been such a strong partnership with the City of Stoughton and with the people who live here, it made a great deal of sense to grow where it all began," concluded Wahlin.

Since 1966, Stoughton Trailers administrative employees have been working from the company's home office building at 416 S. Academy Street, which is also home to the company's engineering, research & design group, and testing facility.
