## RELIABLE CHASSIS SOLUTION

Stoughton, your choice for dependable, tough chassis, provides intermodal solutions for your applications. Manufactured in our Evansville, Wisconsin facility, strategically located close to the Chicago railroad yards, we can handle the logistics to get your chassis anywhere in North America. Our engineering expertise and precision manufacturing allows us to produce the highest quality and most dependable chassis in the market today.

We are dedicated to providing a reliable and profitable solution for you. We build and design chassis to handle demanding transportation needs, while paying close attention to the details. This is why at Stoughton "it's in the Details."

## DURABILITY

American made and engineered durability from the ground up. With over 30 years of experience in engineering and manufacturing chassis, we know how to build to last.

## QUALITY BUILT

Starting with Lean Manufacturing and driving towards ISO-9001 certification, everything we do ensures the highest quality chassis products.

## TECHNOLOGICAL INNOVATION

Drawing upon our 60 years of trailer manufacturing experience, we are forging ahead into the 4th revolution of manufacturing with our investment into Smart technology and automation. This technology ultimately leads to new advanced designs.
