## Subject: Slack Adjuster Change

Stoughton Trailers will be implementing a running change to the standard slack adjusters installed on our trailers. The Stoughton standard slack adjuster will be changed from STEMCO to WABCO. This change will take place on orders scheduled to begin production in early May, and in some cases sooner. Existing sales orders will be modified to reflect this change. All future quotations will contain the WABCO slack adjuster as standard equipment.

The WABCO slack adjuster offers a 7-year warranty and a maintenance free lifetime lubrication and sealing design. Please see the WABCO brochure and spec sheet for further details.

Please contact your sales representative if you have any questions or concerns.
