Subject: Top Rail Change for Plate Trailers

In 2017, Stoughton introduced a newly designed top rail that was interchangeable between plate and sheet & post trailers. After careful consideration we have decided to return to having unique top rails for each model. The sheet & post trailers will maintain the current top rail design. The new top rail for plate trailers is a hybrid between the proven lower section combined with the new upper section containing the common T-Bolt slot for roof bow attachment. The redesigned roof bow, also released in 2017, will continue to fit both top rails. Going forward:

Sheet & Post Top Rail: Current design 02-28844-624-50

Plate Trailers Top Rail: Hybrid design plate trailers 02-30306-624-50

This new plate trailer profile will be applied to the front wall upper rail as well for all dry vans. The Stoughton Parts Sales part number will be **02-30306-090-19**.

02-28844-624-50

Current Sheet & Post Rail

02-30306-624-50

Plate Trailers Only

Cannot be used on Sheet & Post
