Subject: Suspension and Landing Gear Change

Stoughton Trailers will be implementing a change to the suspension system and landing gear specified as standard on our dry van trailers.

All future quotations and stock builds will offer the Hendrickson VANTRAAX HKANT 40K air ride suspension system as the standard. Other suspension models are available to be quoted upon request, including the Hendrickson ULTRAA-K and SAF Holland CBXA40 model suspensions among others.

The Jost A441 Magnum is the new standard landing gear for Stoughton Trailers dry vans. With this change, the Jost A441 now offers a 10-year warranty to Stoughton Trailers customers. Other options are available for quotation, including the SAF Holland Atlas 55 among other models.

All current orders and quotations in our system will be honored with the suspensions and landing gear as quoted. All future quotations and future builds of stock trailers will contain the Hendrickson VANTRAAX HKANT 40K suspension system and the Jost A441 landing gear.

Please contact your sales representative if you have any questions.
