Dri-Slide* Multi-Purpose Lubricant, 5.25oz Aerosol Can – ITEM # DS-L903

A versatile penetrating formula of Technical Fine grade moly and Graphite with rust and corrosion inhibitors.

Broad range of uses makes this our largest-selling lubricant. One of the easiest ways to apply drislid. It is the most widely specified dry film lubricant in aviation maintenance manuals and for general industrial MRO applications, for tractor-trailers, motorcycles, bicycles, and even weapons. Effective temperature range of -20* F to 750* F (7* C to 537* C). Agitation required.

Drislide Multi-Purpose dries to a dry moly film, that bonds to the metal service, staying in place, to lubricate longer than other lubricants. Does not collect dust & dirt and repels moisture.
